Nationally Recognized Certification Programs

AGC's BIM Education Program (CM-BIM)

AGC's BIM Education Program — developed in conjunction with leading BIM practitioners, technology firms and educators—is designed to prepare construction professionals at all experience levels to successfully implement BIM on a construction project.

The CM-BIM is the construction industry's only credential that teaches the practical application of the BIM process for commercial construction firms.

AGC's Lean Construction Education Program

This series of courses that progressively cover a range of topics essential to Lean Construction, including:

- Variation and pull in production
- Lean Workstructuring
- The Last Planner® System
- Lean supply chains and assembly
- Lean design and pre-construction
- Problem-solving principles and tools

AGC's Supervisory Training Program (STP)

Specialized training written by contractors for contractors. Instructor- coursework per topic.

- Unit 1: Leadership and Motivation
- Unit 2: Communication
- Unit 3: Planning and Scheduling
- Unit 4: Contract Documents
- Unit 5: Improving Productivity and Managing Project Costs
- Unit 6: Risk Management and Problem Solving

Don't need the program certificate, take the units based on your firms need.

AGC's Project Management Development Program (PMDP)

Specialized training written by contractors for contractors focusing on project management. Instructor- led 16 hours of coursework per module.

- Estimating and Job Costing
- Contract Administration
- Project Administration
- Risk Management
- Leadership

Building Operator Certification Program (BOC)

BOC is the leading training and certification program for building engineers and maintenance personnel. Graduates make their buildings more comfortable, efficient and environmentally friendly, using skills they master in this course.

The credential is valuable to contractors and owners as well, with proven success in client satisfaction by facilitating communication. Graduates have substantially cut operating costs – often at least \$20,000 in annual savings following implementation; and often much more.

Member-Driven Professional Development Programs

Project Manager/Superintendent - Leadership Development Program PART 1

At the heart of every successful construction project is a strong Project Management Team. Multiple interfaces with different groups of people means strong interpersonal and hard skills are critical.

An investment in the PM Team's leaders is an investment in the company's success.

- Liberation as a Lifestyle
- Discover Your Voice
- The Power of Your Voice /Leading Change
- Maximizing Influence
- Business Development
- Being Present and Productive
- Financial Mgt Part 1.
- Communication Code
- Financial Mgt Part 2.

Project Manager/Superintendent - Leadership Development Program PART 2

Safety-Driven

Silica Competent Person Training

Per the requirements of the Respirable Crystalline Silica Standard (29 CFR 1926.53), employers are required to provide specified control measures at locations where crystalline silica presence measures above 25 micrograms per cubic meter.

This facilitated and interactive 2 Day Training Course allows participants to gain the knowledge they need to assure the effectiveness of their company's silica compliance program, and to understand the requirements and responsibilities of a silica "competent person" on construction sites.

OSHA 10 & 30-hour construction

The basics required by OSHA in our regularly scheduled 10 & 30hr course include applicable OSHA standards, current regulatory changes, guidance for navigating the OSHA website and what to do when OSHA visits. Frequently, company specific courses are scheduled which focus on the safety needs of that company's workforce and work practices.

OSHA Hazard Communication/Global Harmonization Program

This class updates members on the new hazardous material handling aspects of the Global Harmonization effort. New Safety Data Sheets are reviewed and new labeling requirements are covered.

OSHA specific classes

Taught by OSHA Region VI training center, classes are offered in Albuquerque throughout the year. Included courses: OSHA 510, OSHA 500, OSHA 511, OSHA 501, OSHA 502, OSHA 503. In addition, classes are available covering ergonomics, permit-required confined space, electrical standards, fall protection, scaffolding, cranes, derricks and material handling, excavation, trenching and soil mechanics and more.

First Aid/CPR/AED

This 8-hour class includes the latest thinking on proper and acceptable CPR and first aid methods. Also included are familiarization guidelines for using AEDs. Attendees receive a 2-year and 3-year certification card.

Lead-Safe Certification and Refresher training

This 8-hour course taught by EPA Accredited Trainers provides the renovation, repair and painting lead certification and 4-hr. refresher course for those who've attained their RRP Certification.

National Center for Construction Education & Research (NCCER)

Take control of your workforce by offering the NCCER training, assessments and certifications that meet the needs of your specific company. NCCER offers a full range of options for all of your employees from entry-level recruits to seasoned craft professionals.

Companies can become accredited and offer NCCER training and assessments in-house or look for an NCCER accredited association or school near them that offers the programs they need.

There is no better time than now to get started with recruiting new employees, upgrading the skills of your current workforce and offering career paths that include mentorship, crew leadership and management programs.

NCCER's resources include

- Accreditation
- Standardized Training and Assessments
- Over 70 Different Craft Areas Covered
- 4,000+ Accredited
- Training and Assessment
- Industry-Recognized Credentials
- Instructor Resources
- Custom Book Build
- Recruitment Resources
- Online Curriculum and Testing
